TryHackMe: suyashgargote26

Summary

Offensive Security-focused cybersecurity student with hands-on experience in web application penetration testing and vulnerability exploitation. Skilled in identifying and exploiting OWASP Top 10 vulnerabilities using tools like Burp Suite, Nmap, and SQLmap. Built AI-driven security tools and performed real-world attack simulations through labs and projects. Actively seeking Red Team / Pentesting internship opportunities.

Education

Bachlor Of Technology in Electronics And Computer Science — 2023 – Present
Pillai College Of Engineering,Panvel — Current Avg GPA:- 7.71

Technical Skills

Cybersecurity & Networking: Networking (TCP/IP, DNS, HTTP), Linux, Windows internals

Web Security**:** Authentication & authorization, OWASP Top 10, SQL injection, XSS, access control issues

Threat Detection & Security Analysis: Log and alert analysis, Anomaly and suspicious behavior detection, Phishing email analysis and URL inspection.

Vulnerability Assessment & Penetration Testing: vulnerability assessment, web application testing

Cloud Security(foundational):Google Cloud shared responsibility model, IAM roles, service accounts, and permissions, Basic cloud network security (firewalls, access controls), Introductory exposure to cloud security monitoring

Programming & Scripting: Python, Bash, javaScript,C/C++

Security Tools: Nmap, Burp Suite, Wireshark, Nikto, SQLmap, JohnTheRipper, Google Dorking, basic OSINT techniques

Projects

AI-Hunter – Autonomous Security Testing & Detection Framework

Designed and built AI-Hunter, an RL-inspired autonomous web vulnerability scanner.Implements action-space exploration, behavioral reward scoring, and confirmation loops to detect XSS and SQLi with reduced false positives.
Focuses on safe, scope-aware scanning for bug bounty and security research use cases. (AI-Hunter)

SacchAI – AI-Powered Cyber Safety & Misinformation

Build Security-Focused platform to identify phishing emails, malicious links, fake news, and deepfake content using Google Gemini,Fact Checking API and VirusTotal API. (Sacch-AI**)**

Password Vault – Python CLI Tool

Secure password manager using Fernet encryption & master authentication.Applied cryptography principles with modular design.(Password Vault)

Hands-on Labs / Platforms

Completed labs on Web Exploitation, Privilege Escalation, and Reconnaissance techniques.

Practiced real-world attack scenarios including brute force, enumeration, and exploitation workflows.

Experience

GDG PCE Jun 2025 - Present
Technical Member Panvel, India

Conducted an Ethical Hacking workshop for 60+ participants, covering real-world attack methodologies and cybersecurity fundamentals. Demonstrated practical exploitation techniques including SQL Injection (SQLi), Cross-Site Scripting (XSS), IDOR, and password cracking using JohnTheRipper.

Showcased reconnaissance and enumeration techniques using Google Dorking, WHOIS lookup, and social media intelligence gathering, along with network scanning using Nmap and web directory enumeration using Dirb and Gobuster. Introduced CTF concepts, password security practices, and structured hacking methodologies in a controlled and ethical environment.

Skills & Competencies

Leadership: Led my team during the **Internal Smart India Hackathon (SIH)** selection round.
Communication Skills: Strong presentation and writing skills, developed through Conducting Workshops, Project work, and extracurricular activities.
Team Work: Worked closely with peers, mentors, and faculty while organizing technical events, leading hackathon teams, and building projects.
Self-motivation: Highly self-driven learner with hands-on, self-taught experience in cybersecurity, ethical hacking, and security-focused development. Regularly explore new attack techniques, defensive strategies, and tools through personal projects and practical experimentation.
Networking: Actively grow professional connections on LinkedIn and at industry meet-ups, staying engaged with diverse communities and emerging trends.
Analysis & Problem-solving skills: Skilled at breaking down complex problems and creating efficient solutions, strengthened through coding challenges and project work.
Languages: English(Fluent), Hindi(Fluent), Marathi(Fluent)

Awards and Achievements

Code Clash Winner (CSI-PCE): Secured **1st rank** in an inter-college competitive coding competition organized by the CSI PCE technical committee.
Code Clash Winner (CESA-BVCOE): Achieved **3rd rank** in a **state-level** competitive coding competition organized by CESA, BVCOE.
Vibe coding Winner (CSI-PCE): Won **1st place** in a **2-hour rapid hackathon**, demonstrating problem-solving ability and efficient solution design under time constraints.

Certifications & Learning

CEH (Certified Ethical Hacker) – In Progress
Pre Security – tryhackme
Career Essential in Cybersecurity – Microsoft & Linkedin Learning
Linux 101 – TCM Security
Python(Basic)- Hackerrank
